

INTRODUCTION

TO

SOCIOLOGY

"These social changes . . . are comparatively public matters, and this history is chiefly concerned with the private lot of a few men and women; but there is no private life which has not been determined by a wider public life, from the time when the primeval milkmaid had to wander with the wanderings of her clan, because the cow she milked was one of a herd which had made the pastures bare. Even in that conservatory existence where the fair Camelia is sighed for by the noble young Pineapple, neither of them needing to care about the frost or rain outside, there is a nether apparatus of hot-water pipes liable to cool down on a strike of the gardeners or a scarcity of coal."

George Eliot, 1866

I'd Rather Be Studying

We hope this is an interesting and intellectually useful course for you. Set high standards, for all of us. Take your studies, seriously. Do all your studies the best you can and do them on time. Learn all you can and if there is anything I can do to help you learn more, let me know.

Of Course

Introduction to Sociology

Sociology 100 FC2

*7:30-8:45 p.m. Tuesdays and Thursdays in Room 3203 Art-Sociology Building
Fall, 2009 University of Maryland, College Park*

This course is intended for first-year students and has no prerequisite.

The Meaning of Life

"Education," Robert Redfield wrote, "is a conversation about the meaning of life, as each sees some part of it, on behalf of everyone." A CORE of this conversation is the Liberal Arts and Sciences Studies Program, the general education portion of your degree curriculum. This course has been approved as a CORE Distributive Studies course. Distributive Studies courses are designed to ensure that you will take a look at several different academic disciplines and the ways they create and analyze knowledge about the world.

Course Description

"The task of sociology," Joan Huber wrote, "is to explain the way the totality of social patterns works together, whether well, not so well, or badly indeed. Sociologists study how patterned ways of behaving in various arenas (political, economic, and religious, for example) interact as people try to provide for themselves and reproduce the next generation of workers. The intellectual challenge of developing a theory of human organization is sociology's primary reason for existence."

This course is a comparative, historical, interdisciplinary study of human societies that focuses on the main components of human societies, how they are organized, how they change, and how they come to shape our collective social existence.

What is the Question?

The primary questions of this course are:

1. Why is a society the way it is?
2. Why aren't societies always and everywhere the same?
3. What are the main features of a society and how are they interrelated?
4. How and why does a society change?
5. How does society come to shape our collective social existence?

Course Objectives

1. To help you to clarify and expand your questions about society, social change, and the collective aspects of human social behavior;
2. to help you to think sociologically about the organization of social life as you continue to develop your own theory of society;
3. to help you to better understand society, social change, and the collective aspects of human social behavior by learning some of the basic knowledge, concepts, and principles of sociology; and
4. to encourage you to read critically, to think analytically, and to write clearly.

Common Reading

This course features three books, one article, and a slew of handouts. The books by Diamond and Nolan-Lenski are available for purchase at the University Book Center. The book by Ruesch is available for purchase in xeroxed form at the Armory Copy Center (O127 Armory). The article is available online through the library website. The handouts will be distributed in class.

Class Attendance and Participation

This course requires that you attend and participate in class meetings. We have designed the course so that there is substance to each of our class meetings. Class

meetings provide important information, documentary film material, and discussion. Your questions and comments improve the value of the course. We take attendance at every class meeting because it helps us determine your command of course material (there is much that you learn in your courses that is not measured on even the most carefully crafted graded assignments), helps us learn your name, indicates how well we are doing, reminds you of your academic responsibility, and provides useful information for letters of recommendation. Moreover, research studies indicate that class attendance is a better predictor of grades than the number of hours you study outside of class and even better than your high school grade point average and your SAT score. If you do not know University policy regarding class attendance, please learn it before the beginning of our second class meeting. The complete policy is available online at www.inform.umd.edu/ugradcat/. If you have a University-excused absence, please inform me.

Religious Observance

If you need to be absent from class to participate in a religious observance, please provide me with a written list of the dates you will need to be absent before the end of the second day of classes. I will make certain that you are not disadvantaged because of your absence. University policy regarding religious observance is available online at www.president.umd.edu/policies/docs/iii_510a.pdf

Examinations and Small Assignments

This course features four exams and several small assignments. The dates of the exams are listed below in the Course Calendar. Please honor the dates of these assignments. If you are unable to take an exam with your classmates because of a University-excused absence, you may arrange to take a make-up exam. If you don't know University policy regarding the very few circumstances in which professors are obliged to provide make-up examinations, please learn it before our second class meeting. The policy is available online at www.inform.umd.edu/ugradcat/

Grading Scheme

Your final grade in the course will be weighted as follows:

20 percent class attendance, participation, and small assignments

20 percent for each exam

All your work is graded for timeliness, accuracy, completeness, written expression, originality, and, most of all, how well it demonstrates a profound understanding of the material. (Late assignments are docked one-third letter grade for each calendar day late and assignments that are more than seven days late receive no credit.)

	A+ = 4.3	A = 4.0	A- = 3.7
B+	= 3.3	B = 3.0	B- = 2.7
C+	= 2.3	C = 2.0	C- = 1.7
D+	= 1.3	D = 1.0	D- = 0.7
		F = 0.0	

Know No

This course provides no extra-credit assignment.

Academic Honor Code

I teach this course each semester and each semester I try to improve the course, keeping the lectures, readings, films, handouts, etc. that are effective teaching tools and changing or replacing those that are not. Much about the course necessarily remains the same from semester to semester. I recite all of this because some students violate the University Honor Code (submitting work they did not do, cheating on exams, etc.). Whenever this happens I am required to report the violation to the Student Honor Council. Don't let this happen to you. The assignments in this course are not too difficult for you. My help is available to you.

Please affirm your commitment to the honor code ("I pledge that on my honor I have not given or received any unauthorized assistance on this assignment") on all your graded assignments. If you don't know the University Honor Code, please learn it before our second class meeting. The Honor Code is available online at www.studenthonorcouncil.umd.edu/code.html

Disability Support Services

If you have a documented disability, please register with the Office of Disability Support Services and obtain the accommodation request form and give it to me. The rules for eligibility and the types of accommodations you may request are available online at www.counseling.umd.edu/DSS/receiving_serv.html

Learning Assistance Center

If you are having academic difficulty in this course or in any course make use of the services of the Learning Assistance Center. The Center provides help with listening and note-taking, textbook reading, exam preparation, exam skills, writing skills, and much more. More information is available on its website www.counseling.umd.edu/LAS
